Program category(ies)

Health Care occupations, training or industries

The CPR with AED program was designed specifically for laypeople and is based upon the 2010 International Consensus on Cardiopulmonary Resuscitation (CPR) and Emergency Cardiovascular Care (ECC) Science. Basic First Aid was created to help students develop basic first aid knowledge, skills, and the confidence to respond. The program is an excellent choice for both the community and workplace setting, and is consistent with recommendations of the 2010 National First Aid Science Advisory Board and OSHA's best practices for first aid training programs in the workplace.
